Subject: Objections to the C2C proposals
Date: 08 January 2025 09:09:53

Dear Secretary of State,

I am writing to object to the GCP Submission for the Cambourne to Cambridge Busway.

The current proposal to construct a 2.5m high embankment for this purpose could lead to a significant increase in the flood risk to the Gough Way estate as well as also to some properties on Barton Road.

I live with my husband at [REDACTED] and we have been resident there since 1983, i.e. for the last 41 years. We hoped, when we bought the property, that the first flooding would be a one off occurrence since a relief channel had been constructed and the brook had been buried in a concrete culvert under the footpath and roadway. Unfortunately, all this didn't prevent another flood to occur in October 2001 which affected 27 properties including the sewage pumping station.

We are afraid that if the busway goes ahead as planned many of us will find our homes uninsurable and as a consequence unsaleable. In view of all this, we will urge you to reject the proposal.

Please, reject the proposal also in view that this busway will involve the destruction of 500 fruit trees from the orchard in Coton. This will also mean a major threat to the wild life as well as increased greenhouse gases in the atmosphere.

Yours faithfully,

Dr. Victoria Schiffmann
