You don't often get email from [REDACTED] [Learn why this is important](#)

Dear transport infrastructure.

I live at [REDACTED]

I just read the report regarding using brookfields as a site compound to upgrade and move train station. For 10 years we have petitioned and fought to save this land and have gained TPO status on many of the trees on the site. It is considered as a wildlife haven and is also a site of many underground brooks and springs (given the name brookfields).

If you were to clear this site of trees you would be in violation of TPO rules on the tree and potential opening up a vast amount of flood risks. There is currently a flood happening on mill Lane due to potential clearance of land around this area.

It is not a suitable area to clear due to these things and surely there is a more suitable area to use.

Also mill Lane is impossible to get down for heavy machinery. It is unsafe as the school is there.

Many thanks Nina Smith
