Subject: Network Rail level crossings - traffic censuses

Dear Ross,

Thank you for getting in touch today about the traffic censuses that Network Rail have instructed you to undertake on the 29 crossings under their proposals between the 18th and 26th June.

As discussed, I am not happy with the short notice which is within our 14 day licence application period, and has not been discussed with officers at all. Although this period does cover weekends, it does not cover any holidays, and is therefore not representative of times when the rights of way network is likely to be used more heavily. It is not appropriate to ascribe a methodology for a road network to the rights of way network. However, I appreciate that these are your instructions and I have left a message for Mark Taylor at Mott MacDonald and will let you know if a different start date for the census is agreed.

To get in touch with the Rights of Way Officers please use our online 'Report it' tool at http://www.cambridgeshire.gov.uk/info/20081/roads_and_pathways/10/roadworks_and_faults
Choose the first option (report a problem).

If you select the paths affected in each area you can explain what you need to know, and this will come to the relevant officer.

With regard to the licence applications, I have spoken to the Street Works team who advise that you do need to make your applications to the street works address copied in above. They are have a high workload at present (having received a large number of applications last week), so they will advise you as to the timescale anticipated for approval.

I look forward to receiving your methodology and list of crossings and proposed census type as soon as possible.

Kind regards,
Camilla
