Dear Sir/Madam,

I wish to email at my frustration that this inquiry is to be reopened.
I find it utterly distasteful that the appellant has tried to revise plans for such a move.

This cannot and should not go ahead. Hatfield will be losing very valuable Green land that is used by many many people.
Not only this, but there is already a quarry at the far end of Ellenbrook fields, why is there a need for an even bigger site?

The environment will be seriously damaged by this, air pollution from hundreds of vehicles to people, air pollution to tens of species of bird, deer and other wildlife.
Noise pollution to residents who have bought property in the 'only' part of Hatfield that people wish to live 'Ellenbrook', are these people to be compensated by having a quarry across the road, that was once a desirable place to live?

Mud and stones strewn down a small country road into smallford. I note the access to the quarry will be next to 'Notcutts' a garden centre that is extremely popular and has lots of visitors every single day, how is this access going to be made safe for pedestrians and vehicles alike? I can only imagine the tight corners that these vehicles will be driving into and out of onto the small carriageway.

There is much to be lost at this application, environment, people and animals alike and only monetary gain to a business, which just shows the greed of these probably already wealthy owners.

I would like to to be kept informed of proceedings and if possible, I would make representation in person.

Kindest regards,

M Nastri
