Subject: Objection: Revised upcoming Public Access Strategy - Brett Aggregates to quarry Ellenbrook Fields
Date: 15 March 2026 14:32:34

Application ref: PL/0232/21; Appeal Reference: APP/M1900/W/3346607

Dear Ms Vincent,

I have reviewed the new plans and would like to formally register my robust objection to the new public access strategy proposed for the quarry at Ellenbrook Fields.

My 3 main objections to this strategy are:-

1. Accessible Route loss in all weathers – The current concrete pathway provides our family with a safe year-round access for walking and cycling. Reducing this to a narrow gravel and grass path (sandwiched between 4 meter high Bund and lagoons) will severely downgrade this and virtually be impassable in the winterly months with wet muddy soil.
2. Safety: This proposal will force people to use these paths which are in close proximity with heavy machinery, dumper trucks etc. Also, having to navigate crossings with barriers (which some old people may find it harder to open and close) will severely restrict the safety and freedom of the field.
3. Unrestricted access and loss of Visual quality - The path feels narrow and enclosed and devoid of any pleasant visual panorama and diverse wildlife we currently love and enjoy.

I urge the Inspector to recognise my above concerns and recognise that this new access strategy is totally inadequate in protecting and safe-guarding this beautiful park for all residents and park users.

Yours Sincerely,

Mr Narendra Patel.
