Subject: OB Mill Lane, Mossley

To whom it may concern,

I am writing to object to the proposal to establish a storage/ works compound on Brookfield. This must be the most illogical place and biggest waste of public money on the construction of a storage compound that I can think off. The logistics of delivering materials to this proposed site would be a nightmare.

Has railtrack? actually been to the locations and looked at this logically, I am thinking not! The disruption to local residents regarding, congestion, noise, health and safety issues and loss of parking issues is so inconsiderate, it beggars' belief.

Why would railtrack want a storage compound at Brookfield which is on the wrong side of the railway tracks requiring any vehicles larger than a transit van to have to go up Mill Lane and turn onto Carrhill Road and up to the lights at Mossley to come down Stamford Road to the lights at the station to turn left or right when in the past the station car park has been closed off for such storage purposes. In addition, the storage yard further along from the station is more than adequate for loading and unloading and holding of materials. If the site is large enough for the proposed new station, then it is large enough as a storage compound.

I cannot help thinking like most people that there is an ulterior motive for wanting this compound location, which has to have TMBC involvement and the land owner and relates using this as an excuse to try and develop the site.

I would also like to object to the temporary and permanent closure of any access roads or bridge and pedestrian access bridges removal as this totally unnecessary with alternative energy systems available.

I strongly object to the storage compound at Brookfields and related issues for reasons given above.

Yours sincerely

Shaun Parker and Margaret Parker
