Subject: Objection to Transport and Work Act Order to the Department for Transport (DfT) for a new busway to the southeast of Cambridge Cambridge

I Murray Jarvis of [REDACTED], am writing to make a formal objection to the "Application for a Transport and Work Act Order to the Department for Transport (DfT) for a new busway to the southeast of Cambridge", as submitted by the Greater Cambridge Partnership on 9 January 2025. The grounds for this objection are the following:

Similar transport aims can be accomplished by the 2018 proposal to build sections of bus lane adjacent to the A1307 and 1 mile of new road (busway). This alternative is far more environmentally friendly with significantly less destruction of the countryside and requiring less CO2 intensive materials and less money.

It would avoid building a road through a countryside park, permanently scarring the beautiful landscape of the Gog-Magog hills and cutting through valuable farmland.

I do not believe the alternative has been properly considered. It would better serve the area and give far better value for money.

There are already existing and planned cycle routes into Cambridge from Stapleford which are perfectly adequate. I am unlikely to ever use the busway as these cycle routes and the existing park and rides serve my needs and the needs of my family well.

Most importantly, we have a responsibility to future generations to limit irreversible environmental damage when better alternatives exist.
