[Report Suspicious](#)

To whom it may concern.

Network Rail have proposed a a narrow corridor just metres from trains as their design to reroute our local bridlepath.

This will put horses at risk to be so close to fast moving trains. Additionally it will render space for any walkers /cyclists both impossible and dangerous if you've frantic horses in a hemmed in corridor.

Please can you reconsider. It is already a bridlepath that's been blocked for years due to the removal of a level crossing. This path is one of the very few in the vicinity that enables a reasonable route across land rather than roads for people to safely ride their horses.

I am both a rider and a walker and have ridden this route regularly over the years. Please help keep it viable for riders now and for the future.
