[Report Suspicious](#)

Good evening

I am resident of Tackley and a regular user of the bridleway that is planned to be re-routed.

I'm not sure what the motivation to re-route the bridleway is, however I believe this is a poor, ill thought out plan and will only serve to make the village worse.

My objection -

- The NR07 consultation report mentions the subway and developers bridge, there has been no consultation on an infield or northern route. So no reasonable alternative has been sought to the plan.
- The risk to horses riding and pedestrians using the planned route along side the railway is greater than the current bridleway. It is dangerous to all users, the damage a frightened horse could do to anyone in that corridor would be horrific.
- According to documents that have been published there has been no consultation with OCC public rights of way.
- The small print states the bridge will remain open for permissive footpath access, however the access remains until ticket machines are installed of that network rail decide to withdraw it.

The above mentioned planned measure reduce the quality of life to the local residents and visitors and pose a safety risk.

This plan needs to be re-visited and full consultation with OCC and the residents needs to be sought and listened to before any changes are made.

I look forward to seeing progress with this matter that does not detract from our village life.

Best Regards,

Ru Kay
