Dear Sirs

I want to register our objection to this proposed development of a busway across the West Fields in the strongest possible terms.

Any concrete on this flood plain raises the risk of flooding of our property at [REDACTED] as well as others in Gough Way. The drainage of this land into Bin Brook is inadequate and the so called 'relief channel' does not cope with the flow when heavy rains come, instead it backs up across our garden from the northwest corner.

The proposed bridge will further compromise the drainage and putting a balancing pond on the south side of Barton Road in our view will be wrongly positioned.

After a few years of better water management, this seems a backward step.

Yours truly

Micheal and Auriel Schluter
