To the Secretary of State for Transport

We wish to make a representation regarding the Application by Cambridgeshire County Council for an Order under the Transport and Works Act in respect of the Cambourne to Cambridge busway.

Our concern is around the increased potential for flooding of our property adjacent to the Bin Brook, which will be bridged by the busway at a point upstream of the College.

We note that the Application documents include within the Flood Risk Assessment (Technical Report Appendix 13.1) the statement 'there are no impacts of increased flood risk to third parties and no requirement for mitigation measures' (para 5.2.7). However we also note that additional flood risk modelling commissioned by Clare Hall College indicates that the latest busway scheme design submission increases flow rates of the Bin Brook and does increase flood levels at a number of locations downstream of the proposed developments. One of these locations is St John's College.

We request that the Applicant's flood risk modelling is reviewed to identify any necessary mitigation measures.

This representation is made by St John's College Cambridge.

The address for correspondence is

St John's College
St John's Street
Cambridge
