Subject: South Cambs busway

Hello,
I object to the proposed plan to route the 5 mile busway from Babraham to Cambridge Biomedical Campus through the countryside - a madness, when it would be £100million cheaper to route it along the A1307. You only need to read the book Silent Earth by Dave Goulson to understand

that we should be preserving what countryside we have left not tearing it up. For the sake of humanity!

At a more local level there are badger sets in the fields bordered by Babraham Rd, Granhams Lane and Hinton Way, Great Shelford. Every night the badgers follow ancient badger routes across the fields to the gardens in Coppice Avenue for water. There is no water in the fields. Other wildlife in the fields enters the gardens for water too - deer, rabbits and stoats and weasels.

Humans are destroying the planet - please do your bit to save this part! If we tear everything up there will be nothing left. Climate is already changing! Insects have declined hugely. Why make it worse when you have the power to protect it!

BUILD THE BUS ROUTE ALONGSIDE THE A1307!!!
