Subject: The inquiry to hear the Brett application to quarry on Ellenbrook, starting on April 21st - Brett Public Access Strategy
Date: 06 March 2026 16:31:28

Dear Joanna Vincent

I wish to object to the proposals to quarry the old aerodrome at Hatfield, for the following reasons relating to public access:

I currently access the fields for walking on one of the access points at the west end, several times a week. However, huge bunds proposed at the Smallford end alongside the main access road and high-pressure gas main, will be difficult to cross, and an eye saw to the public

The planned footpaths will be close to quarry workings, the quarry access and its internal roads and the plant site. They will be narrow and some paths, in lieu of most of the current concrete taxi way which will be removed, will make access to the fields really tough for existing wheelchair and pushchair users coming from the Ellenbrook end.

The Inspector stipulated that the routes across the park should be attractive and unfettered. The proposals are certainly not attractive and will make access hard to impossible for disabled users, and those users needing to maximise the distance from noisy quarry workings for reasons of their mental health.

I hope the planning application will not be supported at this Inquiry

Yours

Stephen Ross
