Subject: Babraham Cambridgeshire Busway - a note in favour
Date: 13 February 2025 18:00:58

Good evening,

There is a very active local group in opposition to this busway plan, we have received a note through the letterbox encouraging us to object, not to give balanced views but just to object. This is the route they suggested by which to do so.

However, I am one of many local people who object to being singularly represented by this vocal opposition group. The busways and parallel cycle paths are well used across other oars of Cambridgeshire, give great access to the city centre much faster than queuing traffic, and help us stay active. As an overweight middle aged man that actually matters too!

The view that it will 'destroy our countryside' they are pushing is objectively false, although a water meadow beside the Granta is a somewhat important site ecologically, the route as a whole crosses mainly agricultural land, and which is owned by large scale landowners and not benefitting local communities anyway, with few rights of access or amenity value.

I hope my small contribution can weigh at least a little against the far more activist and organised campaign against, as they really do not represent as many people nor as universal a view as they claim.

Kind regards,

Ben Clawson
