Subject: Proposed Guided Bus Way Great Shelford

Dear Sir/Madam,

I am writing to express my strong objection to the proposed plans for the guided busway route that would run through the beautiful fields in Great Shelford.

My family and I live on [REDACTED], with our back garden backing onto these fields. The view, full of thriving wildlife, is something my husband, our two children, dog, and two cats cherish every day. Among the many animals we observe, a muntjac deer – affectionately named Monty by our children – visits our garden daily. The proposed route would not only devastate this precious habitat but likely result in the loss of countless animals like Monty, whose lives are intertwined with this landscape.

Beyond the environmental impact, the disruption caused by construction along Hinton Way would severely affect our daily work and school routines. We only moved into our home a year ago, choosing this location largely for its tranquil surroundings and connection to nature.

We understand there is a more cost-effective alternative route under consideration – one that would protect much of the local wildlife. If the busway must go ahead, we sincerely urge you to adopt this option to minimise destruction to the environment and preserve the natural beauty of our community.

Thank you for taking the time to consider our concerns.

Yours sincerely,
Gemma and Simon Johnson
