Subject: Objection to new busway to southeast of Cambridge

I object to the proposed construction of a new busway to the southeast of Cambridge. The proposed new five miles of road is unnecessary and exceedingly expensive. A bus lane could be built by the A1307 far more cheaply, in sections, and with less interference with traffic. The important and beautiful downland country park should not be destroyed and the ecologically important river Granta should not be disturbed. The alternative would also would be far more useful for access to the proposed expansion of the biomedical campus. Also the proposed route is not usefully near Stapleford or Shelford. For cyclists and walkers the current 'DNA' path provides the ideal route to the Addenbrookes site.
Daphne Sulston 39 Mingle Lane, Stapleford
