Subject: A resounding no to the busway through Coton
Date: 07 January 2025 15:00:43

Dear Sir or Madam,

I am a new resident of Coton, Cambridge as of October 2024 and appalled by this proposal. I chose to raise a family in Coton because of the green spaces, the lack of pollution, and the natural resources such as the Coton preserve and Coton orchard. It is well established that this busway will be detrimental to the local environment (both flora and fauna), the natural history, and the wellbeing of our village. Further the project is financially unwise and does not actually address the issues it claims to solve.

I beg you to listen to the people of this community who actually live and work in Coton and in Cambridge. Our quality of life and what makes our village work will be fiercely impacted by this busway, and at an exorbitant cost. Please find a different solution that actually benefits the people while preserving the green belt and Coton orchard.

We are beyond an environmental tipping point, and we must make better options to preserve our established green spaces or we will have none left. We can not simply regrow a 500 year old orchard. Buses tearing across the countryside are terrifying for local animals and increase exposure to pollutants and noise pollution, detrimental to people's mental and physical health. The potential time saved is inconsequential while the negative impacts are detrimental. Please listen to the community and find another solution.

Sincerely,

[REDACTED]
