Subject: Consultation on new plans provided by Brett Aggregates in relation to the application to quarry on Ellenbrook Fields / Former Hatfield Aerodrome
Date: 06 March 2026 19:42:10

Dear Joanna,

After carefully studying the proposed plans of Brett Aggregates, I would make the following points:-

I see nothing attractive or unfettered by the proposed paths that would be confined by 3-5m high earth mounds, it would be like walking down a tunnel.

Reducing the current concrete taxiway by 60% will mean that those of us with disabilities and/or wheelchairs will struggle with the proposed new routes of gravel and grass especially in the winter/wetter months, when the regular use will render these options inaccessible. This will be particularly relevant to the narrow grass pathways proposed between the two lagoons, that will simply turn to mud! Please refer to the pictures submitted by the Ellenbrook Area Residents Association of existing conditions as a result of winter rains.

No one wants to go for a pleasant walk in the vicinity of noisy quarry workings, large dumper trucks and heavy plant locations. Older and more infirm people, those walking dogs and those escorting children will be at risk from noise pollution and dangerous traffic. We may as well start walking along the A1 corridor!

The concept of outdoor exercise and mental wellbeing will not be in any way therapeutic under these conditions.

Thank you for reading my email and trust you will take mine and my neighbours concerns seriously.

Yours sincerely,

Karen Bailey-Lewis
