

Summary in conjunction with Proof of Evidence - Rob Muir

In summary it is my opinion that the highways required to be used in the applicant's proposal are wholly unsuitable for use on this project as it would endanger people and property if it were to proceed as the manner they are proposing.

It is also my opinion that there is already adequate access from the Manchester Rd compound and any materials and plant could easily be lifted over the tracks with a site crane or moved across the tracks via a level crossing.

I believe this would be a much better and safer way to proceed with the building of a new station.
