Subject: Ellenbrook Fields Quarry - objection to access proposals
Date: 13 March 2026 11:24:29

Dear Sir

Hatfield Aerodrome, proposed Quarry – Objection to Access Proposals

I have viewed the latest documentation from Brett Aggregates on access proposals to Ellenbrook Fields during the proposed quarry workings. I live near to the site and want to make the following objection to the proposals, as I believe they remain inadequate for the amenity of local residents in terms of east-west access and timeliness of restoration.

- The Fields are used for recreation purposes, not just to get from A to B. The proposals may provide 'routes' but the surroundings of many would be unattractive – too narrow and bordered by bunds or active working sites.
- Much of the old taxiway would no longer be available, a particularly useful wide hard surface for multi-purpose use.
- Paths proposed would be too narrow and grass covered in many cases – impractical and unsuitable for use for much of the year, especially during wet weather periods. Paths need to be much wider to enable multi-user usage.
- Lengthy diversions would be required around active quarry areas.
- The current proposals for bringing restored areas back into public use are not tight enough
- This site is currently very well used by local people for amenity purposes, but its current value in encouraging exercise in the fresh air and the improved wellbeing and health as a result looks likely to be lost if these proposals are allowed to go ahead.

Yours sincerely

Mary Ternouth
