Subject: Ellenbrook Fields - New Public Access Strategy Objection
Date: 14 March 2026 14:17:04

My wife and I have lived in the Ellenbrook Area for over 35 years and wish to object to the proposed new public access strategy for Ellenbrook fields that has been put forward by Brett Aggregates.

As active users of the Ellenbrook field area, we do not believe the proposed strategy will provide routes that can be used all year round, especially as the majority of the existing taxi-way is set to be removed. This taxi-way currently provides that all year round, safe and wide access across the park for walkers, joggers, those in wheel chairs, dog walkers and we currently push our grandson in his buggy easily without having to trek through mud.

The new routes are too narrow, and will become very muddy and potentially, dangerously slippery in the winter months for those of us who regularly walk in and across the park.

The new proposed gravel or grass footpath routes are going to be narrow and also very unattractive spaces, placed next to quarry workings and nearby bands, and they certainly do not provide unfettered access to and across the park.

Current access to the diverse wildlife will be severely compromised, if not destroyed altogether.

Users of the park will have to move around close to noisy and unattractive quarry workings, and in some cases, will have to take lengthy diversions to access and cross the park.

Parts of the new paths will also be very close to the equally unattractive and very busy A1057 road.

Walking near the proposed new lorry entrance and driveway will introduce crossings, and areas of danger, close to lorries, dumper trucks, and other quarry traffic.

In summary, these are all strong reasons why the proposed new public access strategy is unacceptable.

Kind regards

Mr Antony Elbourne and Mrs Jane Elbourne
