Subject: Cambourne to Cambridge busway application
Date: 02 January 2025 19:21:37

I wish to register an objection to the Cambourne to Cambridge busway application

My home address is [REDACTED]

My grounds for objecting are:

- The proposal relies on out of date and incomplete data on traffic use and habitat studies. I believe that new surveys are necessary and should be allowed to inform the decision on the application.
- It fails to protect rare and valuable habitat so is unnecessarily damaging to the environment. The orchard in particular supports a huge variety of species, many rare and endangered given their specificity to veteran orchard habitat. This habitat loss cannot be mitigated. Only conservation and succession planting can maintain the habitat value. This has begun with pruning courses taught on site each winter and new trees planted adjacent the veterans.
- It does not represent value for money to tax-payers, while an alternative route (along existing transport corridors) avoids the habitat loss and does present good value.
