Introduction & Summary of Results

An ecological data search was carried out for land at Robertsbridge to Bodiam on behalf of Vicky Standing (The Ecology Consultancy) on 05/03/2021.

The following datasets were consulted for this report:

	Requested	Radius/buffer size
Designated sites, habitats & ownership maps	Yes	2km
Protected, designated and invasive species	Yes	2km

Summary of results

Sites and habitats

Statutory sites	1 AONB
Non-statutory sites	2 LWS
Section 41 habitats	4 habitats
Ancient and/or ghyll woodland	Present

Protected and designated species

International designations	32 species	363 records
National designations	94 species	2,294 records
Other designations	205 species	3,416 records
Total	220 species	3,730 records

Invasive non-natives species	28 species	243 records
------------------------------	------------	-------------

Important Information

PERMISSION

This report is valid until 05/03/2022

This report is for the internal use of Vicky Standing of The Ecology Consultancy (which includes the client where applicable) to inform understanding of the site of interest. This report must not be distributed or published for an external or public audience, for example within the appendix of a report. However, data from within this report may be referenced as long as the Sussex Biodiversity Record Centre is acknowledged.

The separate summary sheet may be published.

It must not be assumed that this report contains the definitive species and habitat information for the site concerned.

The species data held by the Sussex Biodiversity Record Centre (SxBRC) are collated from the biological recording community in Sussex. However, there are many areas of Sussex where the records held are limited, either spatially or taxonomically.

A data search from SxBRC will give the user a clear indication of what biological recording has taken place. The information provided is a useful tool for making an assessment of the site, but should be used in conjunction with site visits and appropriate surveys before further judgements on the presence or absence of key species or habitats can be made. It may be that the content of this report guides the reader as to which surveys should be carried out on the site.

This report was compiled using data held at SxBRC at the time of production. SxBRC takes data validation very seriously, but cannot be held responsible for the accuracy of data included in this report.

SxBRC operates as agent to the individuals and groups who provide their records free of charge. The data suppliers retain copyright on their data, while SxBRC retains copyright on its data search reports.

Impartiality

SxBRC functions as custodian of biological data. Our role is to collect, manage and disseminate wildlife and habitat data. As such, we have to remain impartial and cannot offer opinions on the biodiversity value of a given site. Similarly, we cannot put forward objections to planning applications or be involved in campaigns.

Maps

Based on data currently held at the Sussex Biodiversity Record Centre, the following appear within the search radius:

Statutory site designations	
Area of Outstanding Natrual Beauty (AONB)	High Weald
Non-statutory site designations	
Local Wildlife Site (LWS)	CR20 - South Park Pony Stud Meadows CR59 - Silverhill & Trough Woods
Ownership/management	
Environmental Stewardship Agreement National Trust Woodland Trust site	
Section 41 habitats & other	
Traditional orchard Lowland meadow Coastal & floodplain grazing marsh Deciduous woodland Ancient woodland Ghyll woodland	

Any citation sheets currently available can be found towards the back of this report.

PLEASE NOTE: Proposed/potential statutory site designations are not currently shown on our maps. Please consult Defra's MAGIC website to see if a proposed site is within the search area:

<https://magic.defra.gov.uk/MagicMap.aspx>

Habitat data held by Sussex Biodiversity Record Centre (SxBRC) are created in-house or obtained from a variety of dataset providers. SxBRC continually strive to further improve and update these data wherever possible. However, this map should be treated as indicative rather than definitive. Data may be generated from a range of field survey and/or predictive methods, each of which may have its own inherent limitations. In some situations a recent ground survey may be required to establish definitively the current status of a particular habitat at a specific location.

Key to Maps

The numbers in the table below correlate with the maps on the following pages.

Map 2: Non-statutory site designations		
Local Wildlife Site	1	CR20 - South Park Pony Stud Meadows
	2	CR59 - Silverhill & Trough Woods
Map 3: Ownership/management		
Woodland Trust site	1	Wennow Wood
	2	Springfield Wood

Species Data

Data presented on the following pages are from 1980 onwards and only include species which have a form of protection or designation.

The following designations have been used:

Abbreviation	Designation
Birds Dir A1	Birds Directive Annex 1
Hab Dir A2 P	Habitats Directive Annex 2 Priority Species
Hab Dir A2 NP	Habitats Directive Annex 2 Non-Priority Species
Hab Dir A4	Habitats Directive Annex 4
Hab Reg Sch2	Conservation of Habitats & Species Regulations 2010 Schedule 2
Hab Reg Sch5	Conservation of Habitats & Species Regulations 2010 Schedule 5
WCA	Wildlife & Countryside Act 1981
NERC S41	Natural Environment & Rural Communities Act 2006 Section 41
UK BAP	UK Biodiversity Action Plan Priority Species
Red List	IUCN Red list
Rare/Scarce	Nationally rare or scarce (formerly Nationally Notable)
Sussex Rare	Sussex Rare Species Inventory
BoCC Red	Birds of Conservation Concern 4: Red list
BoCC Amber	Birds of Conservation Concern 4: Amber list
Notable Bird	Sussex Notable Bird List

Details of each designation can be found in the annex of supporting information at the end of this report.

Invasive non-native species records, which are also relevant to the planning process, appear in a separate table to the above.

Confidential records

Badger and otter records are not included in our reports.

Badgers

Local badger groups have requested that badger records remain confidential. If you need further information about badgers in your enquiry area please visit the Badger Trust website:

www.badger.org.uk

Please be aware that there are several local groups covering different geographic areas within Sussex.

Otters

Otters became extinct in Sussex and many other parts of the UK in the late 1960s. This was a result of deteriorating water quality due to industrial and agricultural pollution, along with hunting and habitat degradation. Recent improvements to the state of watercourses and a reduction in persecution have led to the slow return of the otter to the South East. Sussex has over 4,500km of rivers and tributaries. There are no recent breeding otter records and very few resident otters in Sussex. Over the last 20 years however, signs of otter activity have been found in most of the Sussex river catchments.

If there is a river or tributary within 1km of your search area please be aware of the potential for otters in the vicinity, especially if you are undertaking operations that may impact potential otter habitat, or if your work includes Highways operations.

Sensitive records

Wood White and Duke of Burgundy

These two rare butterfly species have a very restricted range in Sussex and so records are reported at a 1km resolution on advice from Butterfly Conservation Sussex Branch.

Table 1: Summary protected and designated species records (excluding bats and birds)

This table summarises records from 1980 onwards. See table 2 for detailed records.

See tables 3 & 4 for bat records, tables 5 & 6 for bird records and tables 7 & 8 for invasive non-native species.

Maximum abundance = highest total number of species recorded at one time.

N.B. Where 'Present' appears in abundance column, no single numerical figure for abundance was provided with the record.

Table 2: Protected and designated species records (excluding bats and birds)

Records in the table are from 1980 onwards.

See tables 3 & 4 for bat records, tables 5 & 6 for bird records and tables 7 & 8 for invasive non-native species.

N.B. Where 'Present' appears in abundance column, no single numerical figure for abundance was provided with the record.

Table 3: Summary bat records

This table summarises records from 1980 onwards. See table 4 for detailed bat records.

Maximum abundance = highest total number of bats recorded at one time.

N.B. Where 'Present' appears in abundance column, no single numerical figure for abundance was provided with the record.

Taxon name	Common name	International Designation	National Designation	Other Designation	Date of earliest record	Date of latest record	No. of records	Max. abundance
<i>Chiroptera</i>	Bats	Hab Dir A2 NP, Hab Dir A4	Hab Reg Sch2, WCA Sch5 s9.4b/s9.4c/s9.5a, NERC S41	UK BAP Priority, RedList GB post2001 CR, RedList GB post2001 EN, RedList GB post2001 VU, RedList GB post2001 NT, RedList GB post2001 DD	23/07/1983	30/08/2013	21	87

		14/07/1994	TQ719236	9 Oakland Drive, Robertsbridge	1 Present	Building Inspection	Unspecified Roost		
		07/07/1994	TQ724235	3 Green Hedges, Langham Road, Robertsbridge	1 Present	Visual			Timber treatment stopped.
		08/03/1994	TQ788239	Old Shoreham, Ewhurst Green, Bodiam		Building Inspection	Unspecified Roost		
		17/01/1994	TQ784236	Prawles Court, Ewhurst Green, Robertsbridge		Building Inspection	Unspecified Roost; Droppings		Evidence of bats.
		23/11/1993	TQ781233	Poplar Cottage, Rocks Hill, Staplecross		Building Inspection	Unspecified Roost; Droppings		Evidence of bats. Rentokil survey.
		28/06/1993	TQ730253	Ockham House, Hurst Green		Building Inspection	Unspecified Roost; Droppings		
		01/06/1993	TQ781226	8 Weald View, Staplecross		Building Inspection	Unspecified Roost; Droppings		Droppings in loft.

Taxon name	Common name	Date	Grid reference	Location name	Abundance	Sampling method	Roost type	Roost location	Comments
		10/07/1992	TQ743223	Walters Farm House, Poppinghole Lane, Robertsbridge		Building Inspection	Unspecified Roost		Bats found during timber treatment.
		23/07/1991	TQ785255	Bodiam Castle National Trust property		Building Inspection	Unspecified Roost; Droppings		Well-documented roost. Rarely visible but often vocal. Fresh droppings found.
		18/01/1991	TQ749229	Park Cottage, Salehurst, Robertsbridge		Building Inspection	Unspecified Roost		
		03/08/1990	TQ743257	Conkers, Bodiam Lane, Silverhill, Hurst Green, Etchingham	6 Present	Visual			A few bats, possibly male, roost separately.
		10/05/1989	TQ7323	Hazelwood, New Road, Robertsbridge		Building Inspection	Unspecified Roost		Owner wants to exclude bats.
		01/12/1985	TQ727242	Bugsell Farmhouse, Robertsbridge		Building Inspection	Unspecified Roost		
		23/07/1983	TQ782256	Bodiam Castle National Trust property	87 Present	Building Inspection	Unspecified Roost		About 40 and 20 in NE turret. About 30 in NW turret. Natterer's suspected.
<i>Eptesicus serotinus</i>	Serotine	18/03/2019	TQ785256	Bodiam Castle	1 Present	Bat Survey	Unspecified Roost	Other	Identification: Observation. Actual Count
		30/06/2014	TQ7444425916	High Down, Salehurst	6 Bat(s)	Aural bat detector			Six serotines seen foraging over meadow and commuting along tree line. Verified with video footage with bat detector audible.
		19/08/2009	TQ785256	Bodiam Castle	1 Present	Aural bat detector			Flying
		21/07/2004	TQ781233	Hollow Wall Farm, Rock Hill, Staplecross, Robertsbridge	107 Present	Building Inspection	Unspecified Roost		
		21/07/2004	TQ781233	Hollow Wall farm, Staple Cross		Building Inspection	Unspecified Roost; Droppings	Unknown	
		19/04/2003	TQ740247	Robertsbridge		Building Inspection	Unspecified Roost		
		02/03/2002	TQ740247	Bantony, Silver Hill, Robertsbridge		Building Inspection	Unspecified Roost; Droppings	Unknown	large amount of old droppings

Taxon name	Common name	Date	Grid reference	Location name	Abundance	Sampling method	Roost type	Roost location	Comments
		07/07/1993	TQ730253	Ockham House, Hurst Green	1 Breeding confirmed; 1 Female; 1 Male	Building Inspection	Unspecified Roost		Possible roost.
		01/10/1988	TQ782236	Brasses Farm, Ewhurst Green, Robertsbridge		Building Inspection	Unspecified Roost; Droppings		Identified from about 1000 droppings, also about 50 Long-eared droppings.
<i>Myotis</i>	Myotis Bat	28/06/2006	TQ7424623993	Southern Water Pumping Station, Robertsbridge	Present	Building Inspection		Other	No droppings or other evidence in buildings. Much activity over and near river recorded during emergence surveys.
		22/06/1985	TQ7825	Bodiam Castle National Trust property	56 Present	Building Inspection			Natterer's Bat/Daubenton's Bat.
<i>Myotis bechsteinii</i>	Bechstein's Bat	16/04/2018	TQ7323	Robertsbridge	1 Adult	Field Observation			Grounded bat - deceased

		01/04/2003	TQ780225	Weald View, Staplecross, Robertsbridge	6 Adult	Building Inspection	Unspecified Roost	House	
		30/10/2002	TQ780225	8 Weald View, Staplecross, Robertsbridge	1 Adult	Building Inspection	Unspecified Roost; Droppings	House	
		25/04/2002	TQ740247	Bantony, Silver Hill, Robertsbridge	1 Adult	Building Inspection	Unspecified Roost	Unknown	
		19/04/2002	TQ740247	Bantony, Silver Hill, Robertsbridge	1 Adult	Building Inspection	Hibernacula Roost	Mine/Tunnel	Hibernating in tunnel
		18/11/2000	TQ716238	Sockneys Wood, Willards Hill, Robertsbridge		Building Inspection	Unspecified Roost; Droppings		
		02/08/1997	TQ739237	13 Fayre Meadow, Roberstbridge		Building Inspection	Maternity Roost; Droppings		Droppings found. Owners saw 1-2 baby bats in June.
		12/07/1997	TQ795245	Old Forge Cottage, Ewhurst Green	1 In flight	Building Inspection	Unspecified Roost; Droppings		Droppings found. One bat seen flying in the loft. History known.
		12/10/1996	TQ765263	Lodge Cottage, South Park, Bodiam	1 Dead Juvenile	Building Inspection	Unspecified Roost; Droppings		Found dead in the roost, droppings also found.
		26/10/1995	TQ780224	Homewood, Forge Lane, Stapelcross Robertsbridge	1 Present	Building Inspection	Unspecified Roost; Droppings		Droppings and owners noticed 'small cluster' of bats in summer.
		30/08/1995	TQ742244	18 Rother View, Roberstbridge		Building Inspection	Unspecified Roost; Droppings		
		08/09/1994	TQ789239	Old Shoreham, Ewhurst Green, Robertsbridge	1 Present	Building Inspection	Unspecified Roost		Pipistrelles also feeding in garden.
		26/01/1994	TQ785236	Prawles Court, Hurst Green, Robertsbridge	6 Dead	Building Inspection	Unspecified Roost		
		15/01/1994	TQ782234	Popular Cottage, Rock Hill, Staplecross		Building Inspection	Unspecified Roost; Droppings		

Taxon name	Common name	Date	Grid reference	Location name	Abundance	Sampling method	Roost type	Roost location	Comments
		07/07/1993	TQ730253	Ockham House, Hurst Green		Building Inspection	Unspecified Roost; Droppings		
		02/07/1993	TQ730254	Ockham House, Hurst Green		Building Inspection	Unspecified Roost; Droppings		
		15/12/1992	TQ780225	18 Weald View, Staplecross	1 Present	Building Inspection	Unspecified Roost; Droppings		Droppings found. Rother Environmental Health Officer reported 2 bats 2 months previously.
		17/11/1992	TQ782232	Hollow Wall Farm, Staplecross		Building Inspection	Unspecified Roost		
		16/07/1992	TQ745223	Walters Farmhouse, Poppinghole Lane, Robertsbridge		Building Inspection	Unspecified Roost		
		23/06/1992	TQ772223	White Lodge Farm, Staplecross	15 Present	Building Inspection	Unspecified Roost		
		11/11/1987	TQ791244	Romney Lodge, Ewhurst Green, Robertsbridge	8 Dead	Building Inspection	Unspecified Roost		Roost known for about 6 years; no apparent cause of deaths, mainly juvenile.
		21/08/1987	TQ724235	Fair Ridge, Bugsell Lane, Robertsbridge		Building Inspection	Maternity Roost		Possible maternity roost.
		03/08/1987	TQ715244	Oast House at Willard's Hill Farm, Etchingam	14 Present	Building Inspection	Maternity Roost		Possible maternity roost.

Table 5: Summary bird records

Confidential records

Records of birds classed as confidential by the Sussex Ornithological Society (SOS) are not included in our reports. These records relate to a range of different species. 27 such records have been flagged up in this search area. The SOS should be contacted directly if potentially damaging operations are to occur.

Email: conservation@sos.org.uk

Wetland Bird Survey (WeBS)

WeBS records are not included in our reports and must be requested directly from BTO: <https://www.bto.org/volunteer-surveys/webs/data>. The data search area intersects with the following WeBS count areas: Bodiam Castle Moat.

Records in the following table are from 1980 onwards.

This table provides a summary of all bird records. Table 6 provides records of Sussex Notable Birds (where applicable).

Maximum abundance = highest total number of birds recorded at one time.

N.B. Where 'Present' appears in abundance column, no single numerical figure for abundance was provided with the record.

Taxon name	Common name	International Designation	National Designation	Other Designation	Date of earliest record	Date of latest record	No. of records	Max. abundance
<i>Aix galericulata</i>	Mandarin Duck				03/05/1999	02/07/2017	26	4

<i>Tyto alba</i>	Western Barn Owl		WCA Sch1 Pt1	Notable Bird	30/12/1982	15/06/2017	53	8

Table 6: Sussex notable bird records

Records in this table are from 1980 onwards.

The list of notable birds can be found in the appendix together with an explanation of the basis of selection.

N.B. Where 'Present' appears in abundance column, no single numerical figure for abundance was provided with the record.

Taxon name	Common name	Date	Grid reference	Location name	Abundance	Basis of selection
<i>Anas platyrhynchos</i>	Mallard	22/06/2019	TQ72L	Salehurst	1 Present	Date
		17/06/2019	TQ7825	Bodiam Castle	1 Present	Date, Positive Breeding
		17/06/2019	TQ7825	Bodiam Castle	31 Present	Date, Positive Breeding

Table 7: Summary invasive non-native species records

This table summarises records from 1980 onwards. See table 8 for detailed records.

Maximum abundance = highest total number of species recorded at one time.

N.B. Where 'Present' appears in abundance column, no single numerical figure for abundance was provided with the record.

Taxon name	Common name	Invasive Non-Native Designation	Date of earliest record	Date of latest record	No. of records	Max. abundance
Amphibians						
<i>Pelophylax ridibundus</i>	Marsh Frog	WCA Sch 9 INNS		05/06/2016	1	1
Birds						
<i>Aix galericulata</i>	Mandarin Duck	WCA Sch 9 INNS	03/05/1999	02/07/2017	26	4
<i>Alopochen aegyptiaca</i>	Egyptian Goose	WCA Sch 9 INNS	23/02/2011	10/12/2018	2	2
<i>Branta canadensis</i>	Canada Goose	WCA Sch 9 INNS	18/02/1992	11/05/2019	40	40
<i>Branta leucopsis</i>	Barnacle Goose	WCA Sch 9 INNS	24/12/2008	24/12/2008	1	10
<i>Chrysolophus amherstiae</i>	Lady Amherst's Pheasant	WCA Sch 9 INNS	07/12/1997	07/12/1997	1	1
<i>Psittacula krameri</i>	Ring-necked Parakeet	WCA Sch 9 INNS	11/09/1999	24/02/2008	3	1
Higher Plants - Ferns						
<i>Azolla filiculoides</i>	Water Fern	WCA Sch 9 INNS	2007	2007	1	1
Higher Plants - Flowering Plants						
<i>Allium triquetrum</i>	Three-cornered Garlic	WCA Sch 9 INNS	24/04/2007	12/05/2016	6	1
<i>Centranthus ruber</i>	Red Valerian	Sussex INNS	03/05/2008	25/10/2011	7	1
<i>Cotoneaster horizontalis</i>	Wall Cotoneaster	WCA Sch 9 INNS	-2002	25/10/2011	2	1
<i>Crocasmia pottsii x aurea = C. x crocosmiiflora</i>	Montbretia	WCA Sch 9 INNS	25/03/2008	28/06/2011	10	1
<i>Fallopia japonica</i>	Japanese Knotweed	WCA Sch 9 INNS	30/09/1999	13/11/2013	17	1
<i>Heracleum mantegazzianum</i>	Giant Hogweed	WCA Sch 9 INNS	01/09/1994	14/06/2017	5	1
<i>Hyacinthoides non-scripta x hispanica = H. x massartiana</i>	Bluebell	Sussex INNS	25/04/1998	12/05/2016	11	2
<i>Impatiens glandulifera</i>	Indian Balsam	WCA Sch 9 INNS	01/05/1987	14/06/2017	44	1
<i>Lamiastrum galeobdolon subsp. argentatum</i>	Yellow Archangel	WCA Sch 9 INNS	24/04/2007	30/08/2011	9	1
<i>Lemna minuta</i>	Least Duckweed	Sussex INNS	26/07/2003	03/05/2008	2	1
<i>Nymphoides peltata</i>	Fringed Water-lily	Sussex INNS	07/09/2008	07/09/2008	1	1
<i>Petasites fragrans</i>	Winter Heliotrope	Sussex INNS	05/09/2007	30/08/2013	17	1

LOCAL WILDLIFE SITE (LWS)

East Sussex

Site Name:	South Park Pony Stud Meadows
Site Ref:	CR20
District:	Rother
Parish:	Salehurst
National Grid Ref:	TQ765259
Size (ha):	30.5
Date:	May 1994
Surveyors:	Marion Finch & Louise Clark

SUMMARY

This is a series of fields, forming a large block of grassland, with two shaws and a number of ponds. The lightly grazed meadows are important for the extensive populations of Adders-tongue Fern (*Ophioglossum vulgatum*) and Green-winged Orchid (*Orchis morio*).

SITE DESCRIPTION

South Park meadows is a large area of grassland to the south of South Park House. The site also contains two small shaws and several derelict ponds.

The fields are sloping and of varying wetness and a number of them are lightly grazed by ponies. The majority of the fields are dominated by Sweet Vernal Grass (*Anthoxanthum odoratum*), Yorkshire Fog (*Holcus lanatus*), Timothy (*Phleum pratense*), Marsh Foxtail (*Alopecurus geniculatus*), Fescue (*Festuca spp.*) and Bent grass (*Agrostis spp.*). Typical herbs include Bulbous Buttercup (*Ranunculus bulbosus*), Meadow Buttercup (*R. acris*), Oxeye Daisy (*Chrysanthemum leucanthemum*), Selfheal (*Prunella vulgaris*), Bird's-foot Trefoil (*Lotus corniculatus*) and Sorrel (*Rumex acetosa*). Lady's Smock (*Cardamine pratensis*) and Greater Bird's-foot Trefoil (*Lotus uliginosus*) are also present in damper areas.

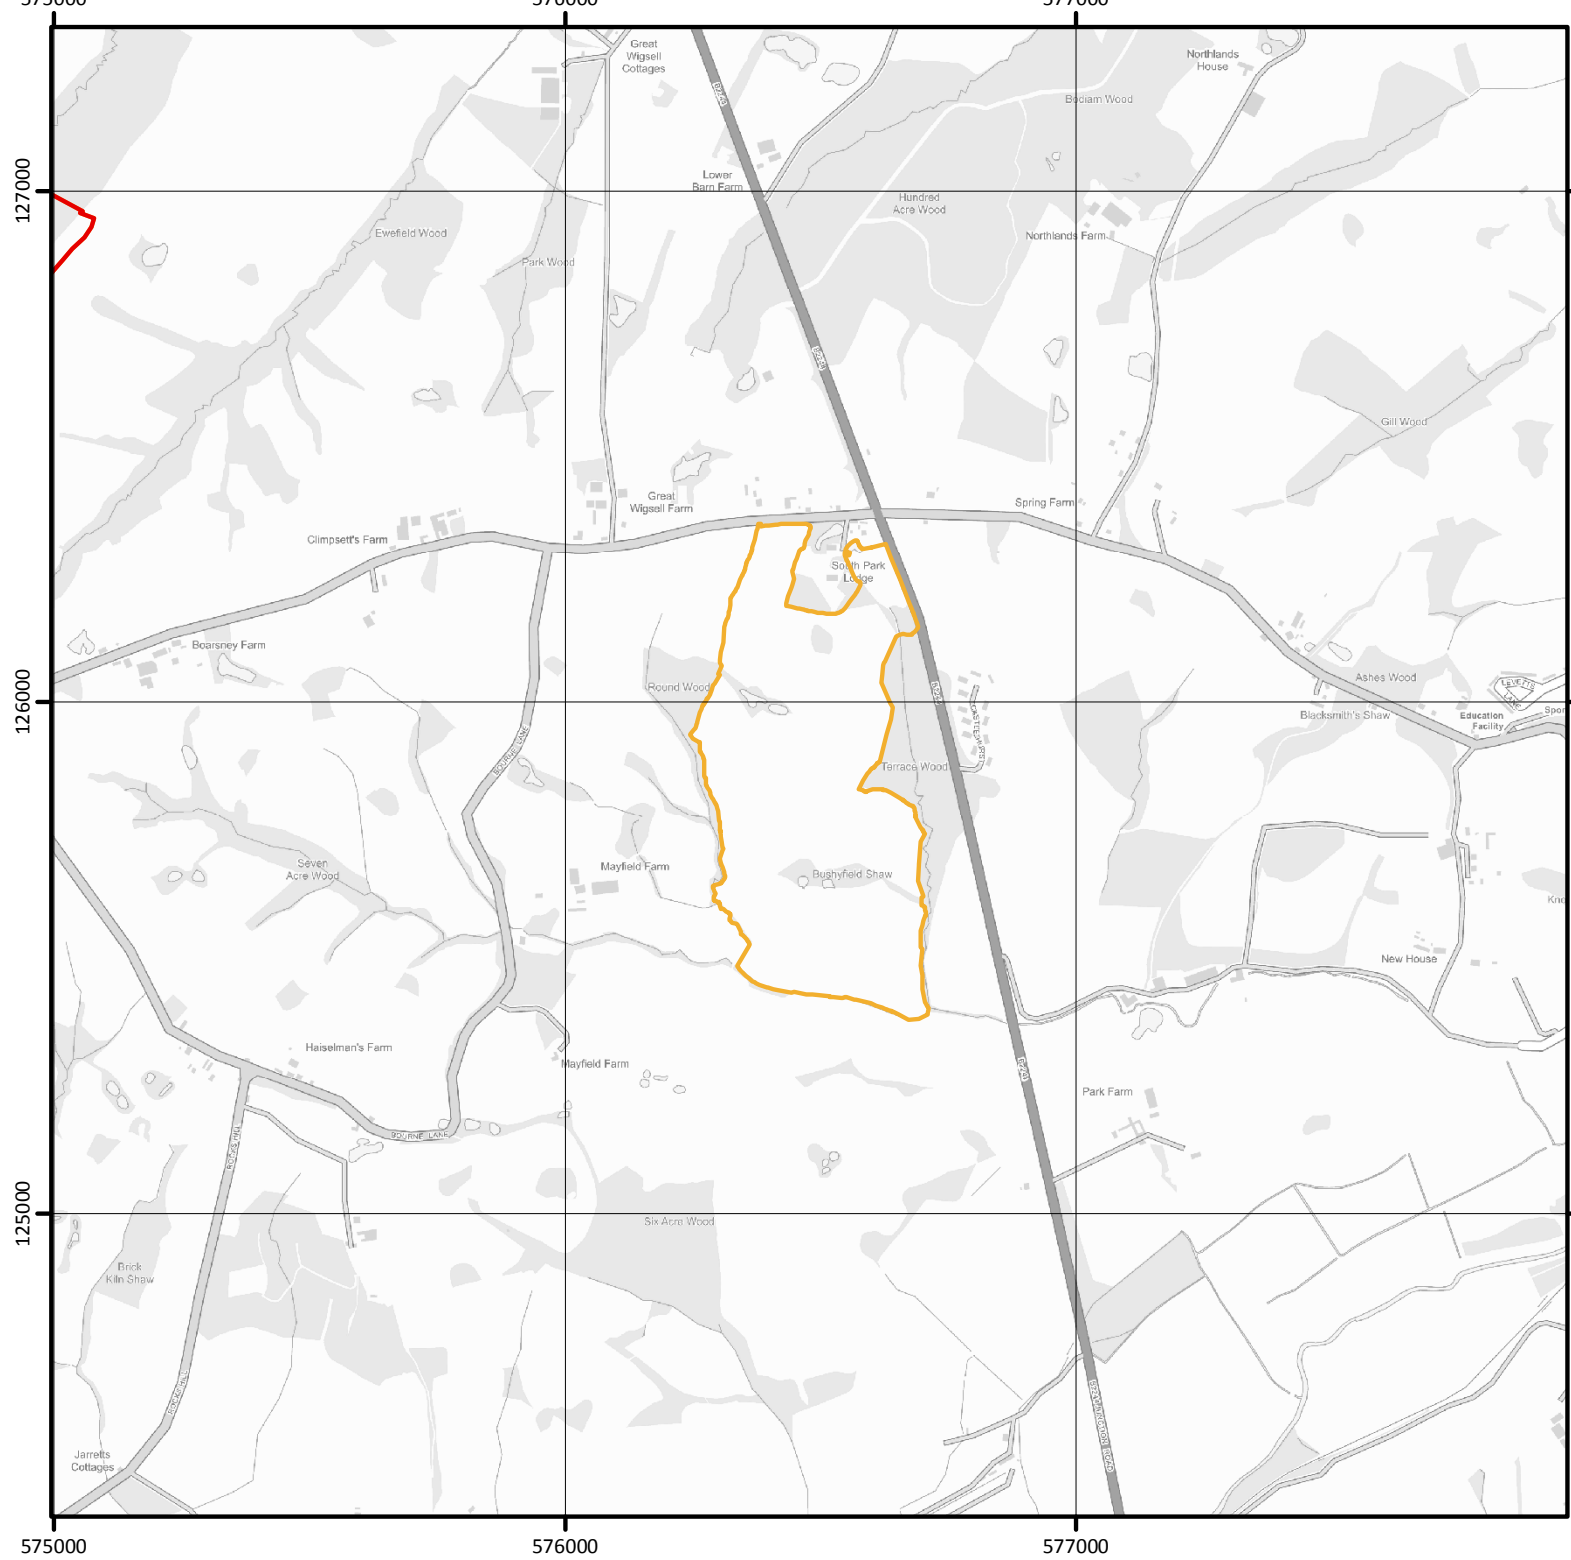

The meadows are particularly important for their large populations of Green-winged Orchid and Adders-tongue Fern. One field is especially species-rich, boasting the herbs already mentioned plus Meadow Vetchling (*Lathyrus pratensis*), Yarrow (*Achillea millefolium*), Black Knapweed (*Centaurea nigra*), Pepper-saxifrage (*Silaum silaus*) and many more.

The shaw consists of overgrown Hornbeam coppice and Oak standards and a ground flora indicative of ancient woodland, including Primrose (*Primula vulgaris*), Moschatel (*Adoxa moschatellina*) and Three-veined Sandwort (*Moehringia trinervia*).

MANAGEMENT RECOMMENDATIONS

The fields are quite lightly grazed at present and thus may require cutting at the end of the season. If cut, the cuttings should be removed. The fields were sprayed in 1990 to control thistles, resulting in a reduction of the Green-winged Orchid population. The thistles still require control, but, a specific application and herbicide should be used.

LOCAL WILDLIFE SITE (LWS)

East Sussex

Site Name:	Silverhill & Trough Wood
Site Ref:	CR59
District:	Rother
Parish:	Hurst Green & Saleshurst
National Grid Ref:	TQ746265
Size (ha):	21.3
Date:	July 1996
Surveyors:	Louise Clark & Joanne L Hodgkins

SUMMARY

Silverhill and Trough Wood form a narrow strip of ancient woodland situated along either side of a south-west - north-east running stream valley. The ground flora along the stream valley is species rich and includes many species indicative of ancient woodland.

SITE DESCRIPTION

At the northern end of Trough Wood, the higher, drier valley sides are dominated by overshot Sweet Chestnut coppice, whilst lower slopes, are predominated by Hornbeam coppice with some Ash and Birch mixed in. There are damp flushes throughout, characterised by Alder coppice over Pendulous Sedge (*Carex pendula*). Bluebell (*Hyacinthoides non-scriptus*) generally forms carpets on the ground, with scattered Male Fern (*Dryopteris filix-mas*) and Broad Buckler Fern (*Dryopteris dilatata*).

The lower part of Trough Wood and most of Silverhill Wood has been cleared of standards and coppiced in recent times. There had also been much replanting of young trees in tubes. However, after replanting, the wood was neglected and a combination of coppice stool regrowth and Birch regeneration has completely swamped and ruined many of the young trees. The vigorously growing Birch has also rendered much of this part of the wood completely impenetrable. Some new tracks have been forged through it in very recent years and thinning and scrub bashing is being tackled in parts.

The stream is situated in a meandering gully with high vertical cliff like banks on some bends, pools, riffles, dams and small water falls along it. The stream-sides are species-rich with frequently occurring patches of Opposite-leaved Golden-saxifrage (*Chrysosplenium oppositifolium*), Ramsons (*Allium ursinum*) and Dog's Mercury (*Mercurialis perennis*) as well as Hartstongue Fern (*Phyllitis scolopendrium*) and lots of mosses and liverworts.

MANAGEMENT RECOMMENDATIONS

Until recently this woodland had not been managed for a number of years. The coppice in the northern part is consequently overshot and that situated on the higher slopes would benefit from the re-introduction of a rotational coppicing regime. Woodland alongside streams should be left un-managed as a non-intervention zone. The southern part appears to have been cleared, re-planted with young trees and then abandoned. Dense Birch regeneration has seriously swamped the young trees. Woodland management has now been re-introduced. Recently created rides should be managed to keep them light, open and wide thus providing suitable habitat for wildflowers and invertebrates, such as butterflies.

Statutory site designations

Site of Special Scientific Interest (SSSI)

Sites of Special Scientific Interest are areas notified under the Wildlife and Countryside Act 1981, as being of special interest for nature conservation. They represent the finest sites for wildlife and natural features supporting many characteristic, rare and endangered species, habitats and natural features. Notification as a SSSI is primarily a legal mechanism organised by Natural England and selected according to specific scientific criteria. *The Guidelines for the Selection of Biological SSSIs*, published in 1989 by the Joint Nature Conservation Council, set down the selection criteria for both biological and geological SSSIs.

There are over 4,000 SSSIs in England of which just under 150 are in Sussex. Natural England is responsible for identifying and protecting these sites. This is achieved, primarily, in partnership with SSSI owners and managers.

Under the Countryside and Rights of Way Act 2000 (CROW) anyone who intentionally or recklessly destroys or damages any of the flora, fauna or geological or physiological features of an SSSI is guilty of an offence. They are liable, on summary conviction, of a fine of up to £20,000.

Special Area of Conservation (SAC)

Special Areas of Conservation are sites designated by Member States under the EC Habitats Directive. The aim is to establish a European network of important high quality conservation sites that will make a significant contribution to conserving habitats and species considered to be most in need of conservation at a European level. There are 12 SAC sites in Sussex.

Special Protection Area (SPA)

Special Protection Areas are designated under the EC Birds Directive, to conserve the habitat of certain rare or vulnerable birds and regularly occurring migratory birds. Any significant pollution or disturbance to or deterioration of these sites has to be avoided. All SPAs are also designated as SSSIs. There are six SPA sites in Sussex.

Ramsar

Ramsar sites are designated under the Convention on Wetlands of International Importance. Under the Convention, each government must select its best wetlands according to very clear criteria, which include: a wetland that regularly supports 20,000 or more waterbirds; a wetland that regularly supports 1% of the individuals in a population of one species or subspecies of waterbird. Wetlands are broadly defined to include marsh, fen, peatland and water. All designated Ramsar sites are also designated as SSSIs. There are four Ramsar sites in Sussex.

National Nature Reserve (NNR)

National Nature Reserves are statutory reserves established under the Wildlife and Countryside Act 1981. NNRs may be owned by the relevant national body (e.g. Natural England in England) or established by agreement. A few are owned and managed by non-statutory bodies, for example the Sussex Wildlife Trust. NNRs cover a selection of the most important sites for nature conservation in the UK. There are six NNRs in Sussex.

National Park

National Parks are beautiful, spectacular and often dramatic expanses of countryside. In the UK people live and work in the National Parks and the farms, villages and towns are protected along with the landscape and wildlife. They differ from Areas of Outstanding Natural Beauty (AONBs) in that each National Park has its own authority for planning control and other services.

The creation of the South Downs National Park (SDNP) was confirmed on 12th November 2009 and it came into being on 1st April 2010.

Area of Outstanding Natural Beauty (AONB)

Areas of Outstanding Natural Beauty are areas of high scenic quality that have statutory protection in order to conserve and enhance the natural beauty of their landscapes. They differ from National Parks in their more limited opportunities for extensive outdoor recreation and by the way they are managed. AONBs are designated by Natural England under the Countryside and Rights of Way Act 2000.

There are two AONBs in Sussex covering approx. 114,000 hectares: Chichester Harbour and the High Weald. Each has an associated body concerned with the area's conservation.

Marine Conservation Zone (MCZ)

Marine Conservation Zones can be established to protect nationally important marine wildlife, habitats, geology and geomorphology and can be designated anywhere in English and Welsh inshore and UK offshore waters. They are established under the Marine and Coastal Access Act (2009). MCZs will be one of six designations contributing to an ecologically coherent network of marine protected areas.

Local Nature Reserve (LNR)

Local Nature Reserves may be declared by local authorities under the National Parks and Access to the Countryside Act 1949. LNRs are declared and managed for nature conservation, and provide opportunities for research and education, or simply enjoying and having contact with nature. Some LNRs are also SSSIs. There are 36 LNRs in Sussex.

Country Park

Country Parks are statutorily declared and managed by local authorities in England and Wales under the Countryside Act 1968. They are primarily intended for recreation and leisure opportunities close to population centres and do not necessarily have any nature conservation importance. However, many are in areas of semi-natural habitat and so form a valuable network of locations at which informal recreation and the natural environment coexist. There are 11 Country Parks in Sussex, the details of which can be obtained from the local authorities.

Non-statutory site designations

Local Wildlife Site (LWS)

Formerly known as Sites of Nature Conservation Importance (SNCI), Local Wildlife Sites are identified at a county level. They typically form a network of sites that are recognised to be of local conservation importance and are often included in Local Authority development plans.

There are many sites within East and West Sussex and Brighton and Hove that are not recognised under the national designation of SSSI (Site of Special Scientific Interest) but are of considerable wildlife value due to the special interest of their flora or fauna. In May 1990 a Sussex-wide project was instigated to identify which non-designated sites were important for wildlife. The selected sites are now known as Local Wildlife Sites. The aim of this project was to protect such sites from land management changes, which may lessen their nature conservation interest, and to encourage sensitive management to maintain and enhance their importance.

Sites within both rural and urban areas were considered but the evaluation process considers two types of site under slightly different criteria:

- **Rural sites**, that may contain habitats such as heathland or ancient woodland, must be of county-wide importance.
- **Urban sites** should recognise the importance of safeguarding important urban wildlife sites, to link all significant greenspaces and to ensure that people in towns have easy access to wildlife areas.

After extensive survey work, the selection of LWS was made by a panel of expert ecologists. This panel included representatives from the relevant County Council, English Nature (now Natural England) and the Sussex Wildlife Trust. A range of specialists with either specific species knowledge or a sound knowledge of the county's ecology were also involved with the selection process. Assessment and identification of LWS is a continuing process with new sites being identified and others deleted as ecological knowledge of the total resource and specific sites increase.

In West Sussex LWS selection is steered by the SxBRC, whereas in East Sussex it is steered by East Sussex County Council in partnership with the district and borough councils. Currently there are over 600 LWS in Sussex.

Although LWS have no statutory protection they need to be considered in the planning process through Planning Policy Guidance such as PPG9 which refers to the Town & Country Planning Act 1990 Section 30. This states that nature conservation issues should be included in the surveys of local authority areas to ensure that the plans are based on fully adequate information about local species, habitats, geology and landform. Plans should be concerned not only with designated areas but also with other land of conservation value and the possible provision of new habitats.

LWS citations outline the characteristics of the area based on its semi-natural vegetation and the underlying geology and are in three main sections :-

- **Summary** which highlights the nature conservation importance of the site
- **Site description or site notes** which gives further descriptive details about the site and its associated species
- **Management recommendations** which give a brief indication of the type of management that would best maintain the nature conservation interest of the site.

Local Geological Site (LGS)

Previously known as Regionally Important Geological/Geomorphological Sites (RIGGS), Local Geological Sites have been identified by local geodiversity groups as being of importance. There are over 120 LGS in Sussex which have been assessed by the Sussex Geodiversity Partnership. The features identified as being important

become a material consideration in any future development, and should be taken into account by the relevant local authority.

A selection of LGS with public access in Sussex can be viewed on the [Sussex Geodiversity Partnership's website](#).

Designated Road Verge (DRV)

Designated Road Verges (DRVs) are areas of roadside verge that have been designated for their special wildlife interest. They can hold spectacular displays of wild flowers, including rare orchids and other plant species indicative of old meadows, and can be of great importance to invertebrates and fungi. There is no statutory protection for road verges, but they can be found within both non-statutory and statutory designations.

As linear features, road verges naturally traverse a wide range of habitat types, soils and geology. The species composition of DRVs can therefore be varied. Swathes of cow parsley, cuckoo flower, primroses and orchids can be found. Downland herbs, meadow flowers and heathers support a range of insects, as do the areas of bare ground which are used by nesting bees and wasps. Reptiles, amphibians and mammals can find shelter along these verges and use them as valuable green corridors.

As the Highway Authorities, the County Councils are responsible for the cutting and management of roadside verges, and they also have a responsibility to conserve biodiversity. Where health and safety measures allow, this is achieved by restricting cutting to certain times of the year (usually when wild flowers have set seed in late summer) and using different techniques to standard verge cutting.

The initiatives for designating and managing DRVs differ between East and West Sussex. DRVs in West Sussex are identified by short oak posts with red discs. In East Sussex they are marked by posts with yellow metal flowers.

In West Sussex, the following guidelines are used to help identify DRVs:

- 1) Site supports locally rare, notable or protected species of flora or fauna** e.g. the plant coralroot. This type of bittercress is only found in two localised areas of the UK; the Sussex Weald and the Chilterns.
- 2) Site is a good example of an uncommon, remnant or declining habitat** e.g. species of sandy grassland along Rock Road in the Parish of Washington.
- 3) Site has good overall species diversity** e.g. Mallions Lane near Cuckfield.
- 4) The assemblage of wild flowers has high aesthetic value** e.g. Franklyn Road outside Haywards Heath hospital with a wonderful display of common spotted orchids in early summer.
- 5) Site has wildlife value that is regarded as important by the local community** e.g. Barnham Road at Eastergate.

Marine Site of Nature Conservation Importance (MSNCI)

Marine Sites of Nature Conservation Importance are non-statutory sites identified on account of the special interest of their marine habitats, the fauna and flora, or for unusual geological and geomorphological features. The identification of these sites is to highlight their importance for marine wildlife and to emphasise the risks of certain operations damaging their interest. There are 23 MSNCIs off the Sussex coast.

Species designations

International legislation

Birds Directive

The European Union meets its obligations for bird species under the Bern Convention and Bonn Convention and more generally by means of Directive 2009/147/EC (Birds Directive) on the conservation of wild birds. The Directive provides a framework for the conservation and management of, and human interactions with, wild birds in Europe.

Annex 1

Birds which are in danger of extinction; vulnerable to specific changes in their habitat; considered rare because of small populations or restricted local distribution; requiring particular attention for reasons of the specific nature of habitat. Their most suitable territories are protected by the designation of Special Protection Areas (SPA).

Habitats Directive

Council Directive 92/43/EEC on the Conservation of natural habitats and of wild fauna and flora, known as the Habitats Directive, was adopted in 1992. The Directive is the means by which the European Union meets its obligations under the Bern Convention. The Directive is transposed into UK law through the The Conservation of Habitats and Species Regulations 2010 (see below).

Annex 2

Species considered to be most in need of conservation at a European level (excluding birds). Special Areas of Conservation (SACs) are strictly protected sites designated under the Habitats Directive and provide a network of important high-quality conservation sites that will make a significant contribution to conserving Annex 2 species.

Priority species - Species which are endangered, the conservation of which the European Community has a particular responsibility in view of the proportion of their natural range which falls within the territory of the Community.

Non-priority species - Species of Community interest (i.e. endangered, vulnerable, rare or endemic in the European Community) whose conservation requires the designation of special areas of conservation.

Annex 4

Animal and plant species of Community interest (i.e. endangered, vulnerable, rare or endemic in the European Community) in need of strict protection. They are protected from killing, disturbance or the destruction of them or their habitat.

National legislation

The Conservation of Habitats and Species Regulations 2010

This is a transposition of the Habitats Directive into UK legislation. The Regulations provide for the designation and protection of 'European sites', the protection of 'European protected species', and the adaptation of planning and other controls for the protection of European Sites. Under the Regulations, government departments and public bodies have a general duty, in the exercise of any of their functions, to have regard to the Habitats Directive.

Schedule 2 lists European protected species of animals

Schedule 5 lists European protected species of plants

Wildlife & Countryside Act 1981

The Wildlife and Countryside Act 1981 (WCA) remains one of the most important pieces of wildlife legislation in Great Britain. This legislation is the means by which the Convention on the Conservation of European Wildlife and Natural Habitats (the 'Bern Convention') and the European Union Directives on the Conservation of Wild Birds (79/409/EEC) and Natural Habitats and Wild Fauna and Flora (92/43/EEC) are implemented. The Act is divided into four parts; Part I is concerned with the protection of wildlife and is split into 27 Sections. Schedules of species relevant to the planning process are detailed as follows:

Schedule 1 Part 1	Birds protected by special penalties at all times.
Schedule 5 Section 9.1 (killing/injuring)	Animals which are protected from intentional killing or injuring.
Schedule 5 Section 9.1 (taking)	Animals which are protected from taking.
Schedule 5 Section 9.4a	Animals which are protected from intentional damage or destruction to any structure or place used for shelter or protection.
Schedule 5 Section 9.4b	Animals which are protected from intentional disturbance while occupying a structure or place used for shelter or protection.
Schedule 8	Plants which are protected from intentional picking, uprooting or destruction (Section 13 Part 1a); selling, offering for sale, possessing or transporting for the purpose of sale, any plant (live or dead, part or derivative) (Section 13 Part 2a); advertising (any of these) for buying or selling (Section 13 Part 2b).
<p>Natural Environment & Rural Communities (NERC) Act Section 41 Species Also known as 'Species of Principle Importance in England' and the 'England Biodiversity List', this list was developed to meet the requirements of Section 40 of the NERC Act (2006). The list is derived from the 2007 revised list of UK BAP Priority Species. It is used to guide decision-makers, such as public bodies, in implementing their duty under Section 40 of the Act 'to have regard' to the conservation of biodiversity in England, when carrying out their normal functions.</p>	
Section 41	Lists species " <i>of principal importance for the purpose of conserving biodiversity</i> ".

Other species designations

IUCN Red List of Threatened Species

The IUCN Red List categories are intended to be an easily and widely understood system for classifying species at high risk of global extinction. The list is divided into nine categories, of which the following are used in this report:

Extinct	A taxon is Extinct when there is no reasonable doubt that the last individual has died. A taxon is presumed Extinct when exhaustive surveys in known and/or expected habitat, at appropriate times (diurnal, seasonal, annual), throughout its historic range have failed to record an individual. Surveys should be over a time frame appropriate to the taxon's life cycle and life form.
Extinct in the wild	A taxon is Extinct in the Wild when it is known only to survive in cultivation, in captivity or as a naturalized population (or populations) well outside the past range. A taxon is presumed Extinct in the Wild when exhaustive surveys in known and/or expected habitat, at appropriate times (diurnal, seasonal, annual), throughout its historic range have failed to record an individual. Surveys should be over a time frame appropriate to the taxon's life cycle and life form.
Critically endangered	A taxon is Critically Endangered when the best available evidence indicates that it meets any of the criteria A to E for Critically Endangered, and it is therefore considered to be facing an extremely high risk of extinction in the wild.
Endangered	A taxon is Endangered when the best available evidence indicates that it meets any of the criteria A to E for Endangered, and it is therefore considered to be facing a very high risk of extinction in the wild.
Vulnerable	A taxon is Vulnerable when the best available evidence indicates that it meets any of

	the criteria A to E for Vulnerable, and it is therefore considered to be facing a high risk of extinction in the wild.
Near threatened	A taxon is Near Threatened when it has been evaluated against the criteria but does not qualify for Critically Endangered, Endangered or Vulnerable now, but is close to qualifying for or is likely to qualify for a threatened category in the near future.
Least concern	A taxon is Least Concern when it has been evaluated against the criteria and does not qualify for Critically Endangered, Endangered, Vulnerable or Near Threatened. Widespread and abundant taxa are included in this category.
Data deficient	A taxon is Data Deficient when there is inadequate information to make a direct, or indirect, assessment of its risk of extinction based on its distribution and/or population status. A taxon in this category may be well studied, and its biology well known, but appropriate data on abundance and/or distribution are lacking. Data Deficient is therefore not a category of threat. Listing of taxa in this category indicates that more information is required and acknowledges the possibility that future research will show that threatened classification is appropriate. It is important to make positive use of whatever data are available. In many cases great care should be exercised in choosing between DD and a threatened status. If the range of a taxon is suspected to be relatively circumscribed, and a considerable period of time has elapsed since the last record of the taxon, threatened status may well be justified.
Nationally rare/scarce species	
Nationally rare	Occurring in 15 or fewer hectads in Great Britain. Excludes rare species qualifying under the main IUCN criteria.
Nationally rare marine	Occurring in eight or fewer 10km x 10km grid squares containing sea (or water of marine saline influence) within the three mile territorial limit.
Nationally scarce	Occurring in 16-100 hectads in Great Britain. Excludes rare species qualifying under the main IUCN criteria. This category replaces Notable, Notable A and Notable B.
Nationally scarce marine	Occurring in nine to 55 10km x 10km grid squares containing sea (or water of marine saline influence) within the three mile territorial limit.
Nationally Notable A	Taxa which do not fall within Red Data Book categories but which are none-the-less uncommon in Great Britain and thought to occur in 30 or fewer 10km squares of the National Grid or, for less-well recorded groups, within seven or fewer vice-counties. Superseded by Nationally Scarce, and therefore no longer in use.
Nationally Notable B	Taxa which do not fall within Red Data Book categories but which are none-the-less uncommon in Great Britain and thought to occur in between 31 and 100 10km squares of the National Grid or, for less-well recorded groups, between eight and twenty vice-counties. Superseded by Nationally Scarce, and therefore no longer in use.
Nationally Notable	Species which are estimated to occur within the range of 16 to 100 10km squares. (subdivision into Notable A and Notable B is not always possible because there may be insufficient information available). Superseded by Nationally Scarce, and therefore no longer in use.
Birds of Conservation Concern 4: Red list	Birds that are Globally Threatened according to IUCN criteria; those whose population or range has declined rapidly in recent years; and those that have declined historically and not shown a substantial recent recovery
Birds of Conservation Concern 4: Amber list	Birds with an unfavourable conservation status in Europe; those whose population or range has declined moderately in recent years; those whose population has declined

	historically but made a substantial recent recovery; rare breeders; and those with internationally important or localised populations.
UK Biodiversity Action Plan Priority Species	The UK List of Priority Species contains 1150 species that have been listed as priorities for conservation action under the UK Biodiversity Action Plan (UK BAP).
Local inventories	
Sussex Rare Species Inventory	The Sussex Rare Species Inventory contains over 3,400 species. These species are selected according to strict criteria of rarity associated with their occurrence in Sussex. It includes species which fall into the above categories of rarity as well as county rarities.
Sussex Notable Bird List	The Sussex Notable Bird List consists of species that are particularly scarce or vulnerable to development. See next page for full details.

Sussex Notable Bird List

The Sussex Notable Bird List consists of species that are particularly scarce or vulnerable to development. It includes species which are either on the Birds of Conservation Concern Red and Amber lists, NERC Section 41 or Schedule 1 species known to have bred in Sussex, have been recorded in summer and may breed in the future or have vulnerable overwintering populations in Sussex. Table 6 of the report will show records of these species based on selection criteria decided on by the Sussex Ornithological Society (SOS).

These records are not available to the general public due to the sensitivity of the data. The SOS has kindly shared these records with us, with the view that better planning decisions can be made with their availability.

Below is the list of species and the date ranges/criteria for their inclusion:

Species	Record type treated as notable in Sussex
Dark-bellied Brent Goose	All records
Mute Swan	Confirmed or probable breeding or late May - early July records
Bewick's Swan	All records
Whooper Swan	All records
White-fronted Goose	All records
European Greater White-fronted Goose	All records
Greenland Greater White-fronted Goose	All records
Common Shelduck	Confirmed or probable breeding or late May - early July records
Wigeon	Confirmed or probable breeding or late May - early July records
Gadwall	Confirmed or probable breeding or late May - early July records
Teal	Confirmed or probable breeding or late May - early July records
Mallard	Confirmed or probable breeding or late May - early July records
Pintail	Confirmed or probable breeding or late May - early July records
Garganey	Confirmed or probable breeding or late May - early July records
Shoveler	Confirmed or probable breeding or late May - early July records
Pochard	Confirmed or probable breeding or late May - early July records
Tufted Duck	Confirmed or probable breeding or late May - early July records
Scaup	All records
Common Scoter	All records
Little Egret	Confirmed or probable breeding records + roost
Purple Heron	All records
Bittern	All records
Little Bittern	All records
Spoonbill	All records
Black Grouse	All records
Grey Partridge	Confirmed or probable breeding or March - August records
Quail	Confirmed or probable breeding or March - August records
Red-throated Diver	All records
Black-throated Diver	All records
Great Northern Diver	All records
Little Grebe	Confirmed or probable breeding or late May - early August records
Slavonian Grebe	All records
Fulmar	Confirmed or probable breeding records
Balearic Shearwater	All records
Leach's Petrel	All records
Honey-buzzard	Information provided in summary only
Red Kite	Confirmed or probable breeding or March - August records + roost
White-tailed Eagle	All records
Marsh Harrier	Information provided in summary only
Hen Harrier	Roost
Pallid Harrier	All records
Montagu's Harrier	Information provided in summary only
Goshawk	Information provided in summary only
Golden Eagle	All records

Osprey	Mid-May to July records
Kestrel	Confirmed or probable breeding or May - July records
Merlin	All records
Hobby	Confirmed or probable breeding or April - August records
Gyr Falcon	All records
Peregrine	Information provided in summary only
Spotted Crake	Information provided in summary only
Corncrake	All records
Oystercatcher	Confirmed or probable breeding or late May - early July records
Little Ringed Plover	Confirmed or probable breeding or April - July records
Ringed Plover	Confirmed or probable breeding or late May - early July records
Dotterel	All records
Lapwing	Confirmed or probable breeding or April - June records
Black-winged Stilt	April to August records
Avocet	Confirmed or probable breeding or March - July records
Stone-curlew	Information provided in summary only
Common Sandpiper	Confirmed or probable breeding or late May - early July records
Snipe	Confirmed or probable breeding or April - July records
Curlew	Confirmed or probable breeding or April - July records
Woodcock	Confirmed or probable breeding or March - August records
Ruff	All records
Black-tailed Godwit	All records
Redshank	Confirmed or probable breeding or April - July records
Wood Sandpiper	All records
Red-necked Phalarope	All records
Little Gull	All records
Little Tern	Confirmed or probable breeding records
Mediterranean Gull	Confirmed or probable breeding records
Common Gull	Confirmed or probable breeding records
Lesser Black-backed Gull	Confirmed or probable breeding records
Yellow-legged Gull	Confirmed or probable breeding or April - June records
Herring Gull	Confirmed or probable breeding records
Great Black-backed Gull	Confirmed or probable breeding records
Black-headed Gull	Confirmed or probable breeding records
Kittiwake	Confirmed or probable breeding records
Black Tern	All records
Sandwich Tern	Confirmed or probable breeding records
Common Tern	Confirmed or probable breeding records
Roseate Tern	All records
Stock Dove	Confirmed or probable breeding or May - July records
Turtle Dove	Confirmed or probable breeding or May - July records
Cuckoo	Confirmed or probable breeding or May - July records
Barn Owl	All records
Snowy Owl	All records
Tawny Owl	Confirmed or probable breeding or May - July records
Long-eared Owl	Confirmed or probable breeding or March - July records + roost
Short-eared Owl	Confirmed or probable breeding or May - July records
Nightjar	Confirmed or probable breeding or May - July records
Swift	Confirmed or probable breeding records
Kingfisher	Confirmed or probable breeding or March - August records
Bee-eater	Confirmed or probable breeding or May - July records
Hoopoe	Confirmed or probable breeding or May - July records
Wryneck	Confirmed or probable breeding or May - July records
Green Woodpecker	Confirmed or probable breeding records
Lesser Spotted Woodpecker	All records
Aquatic Warbler	All records
Marsh Warbler	Information provided in summary only
Cetti's Warbler	Confirmed or probable breeding or March - August records

Grasshopper Warbler	Confirmed or probable breeding or May - July records
Savi's Warbler	Information provided in summary only
Wood Warbler	Confirmed or probable breeding or April - August records
Willow Warbler	Confirmed or probable breeding records
Woodlark	Confirmed or probable breeding or February - August records
Skylark	Confirmed or probable breeding or April - July records
Sand Martin	Confirmed or probable breeding records
Swallow	Confirmed or probable breeding records
House Martin	Confirmed or probable breeding records
Tree Pipit	Confirmed or probable breeding or May - July records
Meadow Pipit	Confirmed or probable breeding or May - July records
Yellow Wagtail	Confirmed or probable breeding or May - June records
Blue-headed Wagtail	Confirmed or probable breeding or May - June records
Grey Wagtail	Confirmed or probable breeding or May - June records
Dunnock	Confirmed or probable breeding records
Nightingale	Confirmed or probable breeding records
Bluethroat	All records
Black Redstart	May - July records
Redstart	Confirmed or probable breeding or April - July records
Whinchat	Confirmed or probable breeding or May - July records
Wheatear	Confirmed or probable breeding or May - July records
Ring Ouzel	All records
Song Thrush	Confirmed or probable breeding records
Mistle Thrush	Confirmed or probable breeding records
Spotted Flycatcher	Confirmed or probable breeding records
Pied Flycatcher	Confirmed or probable breeding or May - July records
Whitethroat	Confirmed or probable breeding records
Dartford Warbler	Confirmed or probable breeding or March - August records
Bearded Tit	Confirmed or probable breeding or March - August records
Firecrest	Confirmed or probable breeding or May - August records
Willow Tit	All records
Marsh Tit	Confirmed or probable breeding or April - July records
Red-backed Shrike	Information provided in summary only
Chough	All records
Starling	Confirmed or probable breeding records
House Sparrow	Confirmed or probable breeding records
Tree Sparrow	All records
Lesser Redpoll	Confirmed or probable breeding or May - July records
Linnet	Confirmed or probable breeding records
Twite	All records
Serim	All records
Common Crossbill	Confirmed or probable breeding or February - June records
Bullfinch	Confirmed or probable breeding records
Hawfinch	All records
Yellowhammer	Confirmed or probable breeding records
Cirl Bunting	All records
Reed Bunting	Confirmed or probable breeding records
Corn Bunting	All records

Sussex Invasive Non-Native Species (INNS)

The Sussex invasive non-native species (INNS) report is produced in order to help minimise the threat posed by invasive species in Sussex. An invasive non-native species is defined as a species whose introduction and/or spread threatens biological diversity. The INNS table includes records of non-native species listed in Schedule 9 of the Wildlife & Countryside Act 1981 (WCA) and 26 other species not in this Schedule but which pose a particular risk in Sussex. These additional species are:

Scientific name	Common name
<i>Pseudorasbora parva</i>	Topmouth Gudgeon
<i>Leucaspis delineates</i>	Sunbleak
<i>Amsinckia micrantha</i>	Common Fiddleneck
<i>Centranthus ruber</i>	Red Valerian
<i>Gaultheria shallon</i>	Shallon
<i>Hyacinthoides hispanica</i>	Spanish Bluebell
<i>Nymphoides peltata</i>	Fringed Water-lily
<i>Petasites fragrans</i>	Winter Heliotrope
<i>Prunus laurocerasus</i>	Cherry Laurel
<i>Hyacinthoides non-scripta x hispanica = H. x massartiana</i>	Hybrid Bluebell
<i>Lemna minuta</i>	Least Duckweed
<i>Acaena novae-zelandiae</i>	Pirri-pirri-bur
<i>Lysichiton americanus</i>	American Skunk Cabbage
<i>Cortaderia selloana</i>	Pampas Grass
<i>Quercus ilex</i>	Evergreen Oak
<i>Harmonia axyridis</i>	Harlequin Ladybird
<i>Lilioceris lili</i>	Lily Beetle
<i>Cameraria ohridella</i>	Horse-Chestnut Leaf-miner
<i>Campylopus introflexus</i>	Heath Star Moss
<i>Trachemys scripta</i>	Red-eared Terrapin
<i>Lithobates catesbeianus</i>	American Bullfrog
<i>Styela clava</i>	Leathery Sea Squirt
<i>Dreissena polymorpha</i>	Zebra Mussel
<i>Dreissena rostriformis bugensis</i>	Quagga Mussel
<i>Lymantria dispar</i>	Gypsy Moth
<i>Thaumetopoea processionea</i>	Oak Processionary Moth

What's the problem

With no natural predators and a benign climate, INNS can out-compete our native plant and animal species. For example, some invasive plant species can change light levels, decrease dissolved oxygen in water, change soil chemistry and its structure, and increase surface run-off and soil erosion. On a more subtle level, INNS can affect ecosystem processes such as nutrient cycling, pollination and regeneration of soils. Invasive fauna can compete with native species, displace them, consume them, act as parasites or transmit diseases, reduce growth and survival rates, cause the decline or extinction of local populations or even entire species.

Legislation

Section 14 of the Wildlife and Countryside Act 1981 (WCA) is the principal legislation dealing with non-native species. Schedule 9 lists plant and animal species to which Section 14 applies.

Section 14 makes it illegal to release or allow to escape into the wild any animal which is not ordinarily resident in Great Britain and is not a regular visitor to Great Britain in a wild state, or is listed in Schedule 9 to the Act. It is also illegal to plant or otherwise cause to grow in the wild any plant listed in Schedule 9 to the Act.

What to do if there is an invasive alien species on your site

If you have any of the species listed in this report on your site, firstly investigate the recommended control for the particular species. You can search by species name on the [GB non-native species secretariat website](#) for further advice.

If there is an invasive non-native species at your site that is not in this report please email us at info@sxbrc.org.uk or call 01273 497570 so that we can update our database.
