Subject: Proposed quarry at Ellenbrook Fields
Date: 10 March 2026 08:36:04

Good morning Joanna,

I am a man of [REDACTED] years of age who has lived in the Ellenbrook area for over 40 years. Since retirement, I have been fortunate to be able to regularly walk in the area known as Ellenbrook Fields. I feel this is good for my health and mental wellbeing.

I usually walk with my dog, with my wife and often our youngest grandson who really enjoys being able to run freely. I have seen the proposed new pathways and entrances and feel that this will stop me being able to access the site easily and I certainly won't be able to let our lively dog off lead or take my youngest grandson in his buggy. It is very disappointing to think that an area which should be used for the benefit of local people will now be inaccessible to us. We currently regularly use the concrete taxiway, which will be replaced by narrow grass or gravel paths. Where we currently enter the field will now be a 4 metre high dirt bund with active quarry works – hardly an enjoyable experience for anyone.

I would ask you to take my concerns into consideration.

Many thanks

Christopher Lyon
