Dear Joanna,

I am writing to assert my protest against Brett Aggregates developing the land at Hatfield Aerodrome. It is my assertion that the local roads cannot sustain increased traffic from heavy trucks. This will increase potholes and road wear. I also assert that there will be rubble left on the roads from fallout or untarped loads, this will lead to tyre punctures and broken windscreens. This currently happens frequently near the Lafarge quarries -just look at the a414. The quarry will also disturb local wildlife and impact on the enjoyment of locals wellbeing. The quarry will also cause noise pollution and may affect the local water table.

The quarry is not of benefit to the local area and would have an overall negative impact.

Kind Regards,
Melanie Weinstein
