Subject: Objection to quarrying at Ellenbrook
Date: 13 March 2026 15:23:58

Dear Ms Vincent,

I would like to object to the public access strategy proposed by Brett Aggregate as I feel it provides inadequate public access.

I live nearby and we spend a lot of time at Ellenbrook fields with our dog and young grandchildren and are concerned that there is lack of all-weather paths which we could use year-round. The proposed pedestrian paths are not weathered proof and would seriously limit our ability to utilise this open space.

We have lived in Smallford for over 30 years and have used Ellenbrook fields throughout the year due to its convenient, attractive and accessible paths, which, I understand from the plan, will not be replicated based on the proposed routes

I strongly feel that the Government Inspectors requirement for clear cross park access is not fulfilled by this strategy so therefore object, and would like to see more attention given to providing a usable, attractive, and accessible space for local people to continue to use
Yours sincerely,

Sylvia Court
Smallford, St Albans
