Again there are plans to destroy Ellenbrook and turn it into waste land. Currently the whole is accessible for residents to enjoy nature and walk freely.

But obviously considering the local residents never to be a concern at the interests of large businesses making a profit.

I walk over Ellenbrook fields every day some times alone, some times with my family and some timed with my neighbours and the dogs. This will longer be possible if there plan goes ahead for restricted walkways.

I am sure the views of local people will make little difference as businesses will continue to keep amending their proposals until gain approval.

Regards
Ian kiff
