Dear Ms Vincent

I am writing to you as a concerned Ellenbrook resident. I am dismayed to see that due to current plans for the new quarry access to Ellenbrook Fields will be greatly restricted. At the moment the area is an important site for the community to walk and cycle in as well as enjoy nature at all times of year and in all weather conditions. I understand that the area we will be able to access will be reduced with access blocked by two large lagoons. Paths will run between quarry workings, large mounds and the main road in some places which is certainly not conducive to a pleasant walk. In addition paths will be mainly grass which obviously is not suitable in wet weather as can be clearly seen from the small areas of grass paths slready in existence. I therefore strongly object to the current plans and suggest that they be altered to allow the unrestrained access that exists at the moment.

Yours sincerely

Eileen Clark
