Dear Joanna

I am writing to express my opposition to the new quarry at Smallford, on the basis of access issues.

The proposal effectively eliminates much of the hard covered pathways, and instead replaces them with grass and gravel paths.

This is no good, and will make it much harder to use the paths, particularly during the winter months, when they are likely to become boggy and waterlogged. And with climate change driving increasingly wetter winters, the problem can be expected to get far worse in years to come. To cope with this change we need more paths using hardstanding, not fewer.

I therefore object to the proposals and ask that they be rejected.

Nigel Harvey, [REDACTED]
